EXAMINER'S AMENDMENT

1. The following changes to the drawings have been approved by the examiner. Figure 1 should be designated by a legend such as --**Prior Art**-- because only that which is old is illustrated. See MPEP § 608.02(g).

In order to avoid abandonment of the application, applicant must make the drawing changes.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Claims 1-11 are allowed due to lack of showing by the prior art of record of a fuel fired furnace having a heating section containing at least one burner for firing the furnace and an air plenum for admitting combustion air to the at least one burner, the furnace having a blower for forcing combustion air into an air duct which is operably connected between the blower and the plenum, the blower having a first power source, the duct having a long axis extending from the blower to the plenum, the duct having a normally closed drop door that can be opened to admit ambient air into the duct, the improving comprising at least one ventilator operably connected to the duct downstream of both the blower and the drop door and upstream of the plenum to force ambient air into the duct toward the plenum, the ventilator having a second power source, the ventilator having a movable close-off plate that is normally closed by which can be opened when the ventilator is in operation to admit ambient air to the ventilator and by way of the ventilator to

the duct, the second power source being different from the first power source so that the ventilator is capable of operation independent of the blower and the first power source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Each of Cratun, Jr. Chin, Broach, Stark, and Cameron is cited to show a heat-input - controlled fuel fired apparatus.
